## CRACKED TOOTH SYNDROME, REALLY A SYNDROME?

8 de Junho

**JAN BERGHMANS**

Língua oficial Inglês

- Graduated from Dental School (Free University of Brussels) in 1983.
- Founder member and actual president of the first Endodontic Society of the country- Flemish Society for Endodontology (FSfE).
- Former active and actual Certified member of the European Society of Endodontology (ESE).
- Former country representative for Belgium at the ESE and IFEA.
- Executive of the VVT (Society of the Flemish dentists) and of the Belgian Academy of Esthetic Dentistry.
- Honorary member of the Bulgarian Endodontic Society.
- Accredited national and international speaker on Endodontics.
- Guest lecturer at the Catholic University of Louvain - Belgium.
- Practice limited to Endodontics in Brussels - Belgium.

*A presentation that covers the misconceptions about cracks in teeth and the restorations of teeth to prevent them from breaking.*

*This lecture is also about some urban legends like teeth weakened by the endodontic treatment, the need for posts and the emotional resistance against cusp coverage for the sake of tissue preservation.*

*Will address the paradigm shift from the actual "symptom based" decision making process to the preventive approach which starts (long) before tissue damage (pulpal and bone) has occurred.*
